

FAYCAL BENMAMMAR

Computer Science Student | Software Development Enthusiast
Belgium | +32465355733 | benmammarfaycal@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFILE

Computer Science student with a background in Information Systems. Interested in software development and web applications, with experience building projects using Python, Django and modern web technologies. I enjoy solving problems, learning new concepts and improving my technical skills through practice and real projects.

TECHNICAL SKILLS

Programming : Python, JavaScript (DOM Basics), SQL, Modern C (Basics)

Backend : Django, Django ORM, Authentication Systems, CRUD Applications

Web : HTML5, CSS3, Bootstrap 5, Responsive Design

Databases : MySQL, MariaDB, SQLite, Database Modeling

Computer Science : OOP, Data Structures, Algorithms, Problem Solving

Tools : Git, GitHub, VS Code, Command Line

PROJECTS

Enterprise Management System

Django | MariaDB | Bootstrap | JavaScript

A web-based enterprise management application designed to manage employees, projects and tasks with role-based access control.

- Implemented authentication and role-based access control.
- Developed employee, project and task management features.
- Designed database models and relationships using Django ORM.
- Built a responsive interface using Bootstrap 5.

BookReviews

Django | SQLite | Bootstrap | JavaScript

A Django web application allowing users to browse books, write reviews and manage their personal book collections.

- Developed user authentication and profile management features.
- Created a responsive interface using Bootstrap.
- Implemented CRUD operations using Django views and models.
- Designed a responsive user interface with Bootstrap.

EDUCATION

Bachelor Degree in Computer Science - Information Systems

University of Bejaia

Studied computer science fundamentals, software development, databases and information systems.

Computer Science Management

EAFC Uccle - Belgium

Currently developing skills in software development, databases, software design and application development.

LANGUAGES

Kabyle (Native) | Arabic (Fluent) | French (Fluent) | English (Professional Working Proficiency)

SOFT SKILLS

- Problem Solving
- Logical Thinking
- Continuous Learning
- Adaptability
- Team Collaboration
- Self-Motivation
